Take four quarts of sitted Flour. Washburn-Grosby Co.'s Buperlative is much the best, one quart inkewarm water, in which are dissolved two teaspoonfuls of sugar, a tablespoonful of melted, butter, and one eup of yeas. Mix and lineed very thoroughly, and have it as soft as can be moded, using as little flour as possible. Make it into small leaves, put it is buttered pane, prick with a fork, and when light enough to crack on the top, bake it. Nothing but experience will show when bread is just at the right point of lightness. Bread is better in small leaves. Let your pans be of it in (of better, of iron), eight inches long, three inches high, three linches wide at the top. This size makes more teacher tender crust and outs more heatly than larger lonves.

degravization of a Powerful Corporation of Promitent Capitalists.

Chicago, July 3d. A morning paper says For more than a week secret communications have been passing between the Chicago agent of a powerful corporation organized for the manufacture of palace and freight cars and day conches and the strikers of the Central Company at Pulman.

All of the olters to the men are in witting, signed by a man of wealth and prominence in the dushiess actrices of the city. The names of a number of eastern capitalists, who are connected with the city file names of a number of the central communicational greater weight. Thus far the deliberations of the central committee, and their replies to the advances made by the corporation have been kept wholly secret, but it is known that every member is hearthly in flavor of the change, if reasonable terms can be agreed upon. As soon as the negotiations have reached a more definite basis, the matter will be laid before the body of the stalkers for their approval. It is thought that the corporation which is conducting the negotiations is identical with the founds seen the reportation which is one which filed its articles with the littinois Secretary of State enrily last week. It has a applicitation of five million, dnd its works will be located at East St. I ouls.

Much of the money back of the enterprise has been subjected by eastern and English capitalists. The corporation which is making these offers means business, said a man who has had a part in the negotiations, and if arrangements can be mideall of the skilled mechanics at Pullman will be hired in a hody. They are thoroughly familiar with the somewhat difficult task of making cars and they could go right at it without a moment delays thus saying a new corporation the thousands of dollars which it would cost to got new men started.

The Saturita and Britannia atarted in the Cowes regatts this morning There is a tremendous influx of visitors, and therelare 300 vessels in the harbor, nearly all of which are decorated with flags and hunting

Mr. Gould's decision not to allow the Vigilantto start today, has caused the keenest disappointment among the inmenies number of yachting enthusiasts presen. The weather is all that could be desired, and thousands crowded the hill slopes auxious to witness the performance of the Yankee yucht. There are various rumors aftont which disagrae with the reasons Mr. Gould assigns for not starting the Vigilant, but it is thought probable that the real reason is the lightness of the wind. The course was that of the Royal Cornwall Yacht Club in the form of an equilateral triangle and was sailed over three thus a distance of forty mutual.

Lowell, Mass, July 30 A fire broke on this morning, just before il o clock in a building used as a storehouse and drying house by White Bros & Co, on in a building used as a storeholes and drying house by White Bros & Co., on Howe street On account of the rebuilding on East Morrimuch street bridge, the fire department werd slow in arriving, because compelled to make a detour by Church street. The flames were then leaping high above the building, and heavy volumes of smoke filled the air, A second alarm was at once pulled in, as soon as Chief Hosmer arrived on the seeme, who at once realized that it would be a stubborn fire to cope with.

The fluiding was situated on the bank of Conjoord river, and was surrounded by wooden buildings of very inflammable character. The fire was confined to the tannery building, in which were about 20,000 hides in process of curing. Loss estimated at \$40,000, fully covered by insurance.

TERRE HAUTE, July 30. President Deba, of the A R U, was greeted by one of the most enthusiastic audiences at the Opera House, last evening, that eve assembled in this city, and many thous ands were turned away. His address on the recent strike and boycott was a conservative one. He said that he had done the recent strike and boycott was a conservative one. He said that he had done everything in his power to provent the Pullman strike, "I am opposed to strikes," said bobs, "and firmly believe in the principles of arbitration I challenge the production of any evidence that I have ever advised any man to strike." Finally, he launched into a political discussion. "I am a Populist, out and out," he continued "There is no difference between Democrats and Republicans, so far as labor is concerned I am ashamed to say that I voted for Grover Cleveland three times. The evidence of the control of capital is shown in the power which Havemover exercises over the present government."

In conclusion, Mr. Debu stated that the fight would be continued in a reform political movement, and he declared that the present strike was the last in which he would ever take part.

The President Dickering. The New York Tribune says The President's share of responsibility for infamons Bill of Sale to Trusts is a controversial matter between him and Senator Gorman. His partisans have considered it beneath his dignity to reply to the destructive assault made in the Senate, and in spite of Senator Vitaly feable apologies the case is likely to go against him before the bar of pullie judgment, since Senator Gorman produced three good witnesses and their testimony has not been challenged. The President's responsibility for the Tariff bill, if one be finally enacted, will not be a controversial matter., Contrary to the unbroken line of precedents in American political history, the Executive has obtruded his opinions upon Congress when there is a legislative deadlock. No bill can now pass which does not

obtain his approval in advance President is now a legislator on the tariff question He is consulted before and after every caucus is held. He is negotiating and dickering with the Senatorial ombine if any flual compromise of bargalu be effected, he will be a party in nterest before the enacted bill can be

WASHINGTON July 30 The Demo-crate conferees of the Senate and House were in session this morning trying to adjust existing differences Democratic conferees as journed pending the arrival of their Republican colleagues at 1 o'clock, they were as the apart as ever on the main tem over which the headlack between

ttems over which the deadlock between the two houses resulted. The whole situated was considered in a very frank manner and there appeared to be not resentioned over the deadle in the Senate last week. Neither side was willing to give in on the three upons of coal, from ore and stigar and absolutely nothing was accomplished. her Boutelle (Rep Me) presented a resolution recognizing the new republic of liawon on the part of the Congress of the United States and supported it in a brief speech. He offered it as a question of privilege. The text of the resolution is as follows:

"Resolved, by the Senate and House of Representatives in Congress, assembled

Niesolved, by the Sanate and Rouse of Representatives in Congress, assembled in that the United bittles of America congratulates the popule of the Hawaman Islands on their just and peaceful assumption of the powers, duties and responsibilities of self-government by their recent adoption of a Republican form of government

pendent republic and the Fresident of the United States shall give proper notice of the recognition of the president of the republic of Hawaii "

MI Dockery (Dem. Mo.) made the point that the resolution was not president of the republic of Hawaii for Brazil, was exactly the same as the resolution, save the substitution of Hawaii for Brazil, was exactly the same as the resolution introduced in the House by the Chairman of the Committee on Poreign Affairs (Mr McCreary) on the Eith of January, 1890 recognizing the republic of Brazil. Under the peculian conditions existing in the relations between the United States and Hawaii it seemed to him (Mr Boutelle) that the resolution involved a question of privilege.

From all that had gone before, the messages of the executive to Congress and other matters, the general public understanding was that these relations had been referred to Congress and that the position of the executive department was one of deference to the initiative by Congress in this matter It was a matter of common knowledge, he said, that the Hawaiian Islands had proclutined a Republican form of government on July 4, accompanied by every minitestration of regard for the United States.

It had always been the policy of this government in recognize and ecourage

United States.

It had always been the policy of this government to recognize and eccourage movements for the formation of free movements for the formation of recognition of the governments. This was an event that appealed to the United States with peculiar force. Last spring when the islands celebrated the anniversary of the dethionement of the late [Queen there were representable and to this mind last. lands celebrated the anniversary of the dethnocement of the late Queen there was a remarkable and to his mind lamentable failure on the part of the ministar of the United States to manifest the sympathy of this country with the people of Hawall in the movement they were making.

people of Hawaii in the movement were making.

In view of this fact, the Congress of the United States was appessed to with peculiar force to be prompt in reongalzing the new republic. The movement, Mr Boutelle suid, was the unimitation of the working of American influence in the Islands and it was to his mind a matter of the highest Importance that the Hoise of Representatives should promptive adopt this resolution wilcoming the ly adopt this resolution wilcoming the government of the Hawalian republic by the recognition of the leading repub-ile of the world—the United States of

America.
Speaker Crisp ruled that the resolu-tion was not a matter of privilege and should be referred to the Committee on Foreign Affairs.

They have been on quite an extended wheeling tour which has been well enjoyed although they have nequatered some pretty warm weather on the journey. They started from Philadelphia over a month ago with Bar Harbor as their destination. They did not attempt to go at racing speed, but stopped at various places of

interest on the way. They intended to wheel to Bar Harbor from this city, but as they received a telegram requesting their presence at that resort as soon as possible, they will leave by this morn-ing's train. Mr. Kane has passed the last twenty summers at Bar Harbor.

the water carefully on the soil. Ferns
should never under any circumst mees
be allowed to get dry, they must at all
times of the year be kept moist. On the
other hand they should not be overwatered, this will do them quite as much
harm as drought, both being very destructive to them. As far as possible the
water used for the plants should be of
the same temperature as the house in
which the ferns are growing.

Rotes from the Assembly Our gorrespondent writes in the Primary work, conducted by Rev. I H. dorgan, of Skowlegan, the subject of the day's lesson was, "The Teacher-His Opportunity," a question which was handled by that gentleman in his usual traight-forward and practical manner. and gave much food for thought to the tenchers who are listening to his suggestive instructions. semblies, Rev Hound A Clifford, was pon a subject especially interesting to the C L S C of 1805-A Ramble in Europe," and in spite of the intense heat the large auditorium was fairly well filled with an attentive and evidently interested audience One of the most interesting tentures of

he day was a demonstration, at the usual afternoon Round Table, by Miss Luctia Sleeper who is assisting Prof Robinson in his gymnastic teathing, upon methods of teaching geography in the Primiry classes by means of the nutural objects around them, by stories, plotures and surface maps, some of the latter, drawn by children from ten to twelve years of age, being shown to illustrate the proficiency acquired by the child in this interesting exercise The concert in the evening was a time

ne and was purticipated in by Mrs. one and was purnsipated in by airs, sparrows, soprano, Mgs. Pike, contraito; Prof. Bowdoin, bass, and Mr. Fred I. Day, tenor, assisted by Mrs. Briggs as planiar. Miss Annie French Libby gave several beautiful selections upon the harp, while Miss Susan Walker, as reader, received the applause that her excellent elocutionary powers so well Greatly to the regret of all, and es-

pecially of the class in Parliamentary Laws, the teacher of the class, Mrs. E II Osgood, was obliged, owing to the sudden death of her mother, to omit her duties for the present. The class voted ununimously to retain their organization until such time as her decision in regard to a continuance of the leason can be received The lecture this afternoon is by Mr.

Hurry Klimball, A. B. a Portland boy and a student at Andover. His subject is "The Good World," a refreshing the day, in which the seum; side of society necessarily plays so important a pure Mr Kumball will preach in the congregational church in Frychdry vil the weather here just now is latensely

hot and the grateful shade of the trees as well as the fresh breeze from the river are thoroughly appreciated by the perspiring Visitors So far the attendance has steadily increased and all the indications point to a more than usually Succeaful ses⊲ion

TURKISH BURIAL CUSTOMS. octed Graves Lend the Com-

There are burnal grounds attached to many of the mosques, picturesque little places filled with diminutive graves and irregular tombstones and thickly overgrown with shrubs and rosebushes It is not the custom in Turkey to keep graves in repair, and Turkey to keep graves in repair, and the monumental stones, being tall and slender, and generally cylindric al, soon full out of the perpendicular, leaning in every direction and lending the conceptories a wild and fan tastic appearance.

Until Mahmud introduced the fez the headstones of man's covered with

the headstones of men's graves were surmounted by carved representa tions of tin buns, but since that time the fez is in universal use-scarlet when new, with a blue tassel Upon the column below the cylinder there is frequently a long inscription, he-giming with an invocation to God or a verse from the Koran, and followed by a short account of the dead man s The tombstones of women either

the tombstones of women either bear no symbol at all, or, as in the great majority of cases, are sur mounted by a sunflower or some thing to the nature of an arabesque or plant. The inscriptions on them are almost invariably in verse. In very tire instances my sure of great uments, which are usually ugly in proportion as they are intended to be beautiful, and like the others are al lowed to fall to ruin

In most of these small cometerie there are narrow well kept walks at a lower level than the graves them selves and contrasting oddly with the will growth of trees and shrubbery on each aide. Persons reputed to have led holy lives are often buried, es pecially in the country, in solitary graves surrounded by eliborate grat ings and covered by roofs and domes and it is not uncommon to see them brightly illuminated at night with votice lamps, like the tombs of saints in Catholic countries

For Mohammedans not only rever

ence the memor) of the dead but be here in the efficacy of then prayers and intervessions. It is a common thing too to see the shrubs about the graves of sainted personages covered with hundreds and even thou sands of scraps of 1 ugs torn by pil grims from then garments and stuck on the bushes to the behef that the offering will preserve the individual from sickness Scribners Magazine Senator Corman a Weakness.

Senator Gorman is very free from the weaknesses that beset the ordr nary inclivability but he has one dis tinct failing He is an invetorate guin chewer He chews guin in the sonate chamber, in the committee room, on the street and at the then ter He does it trustically and quiet ly and there are tew times during the day when there is trien piece of gum in his mouth.
